Rawalpindi, Punjab, Pakistan

FRONT END ENGINEER

I am a proficient Senior Front-End developer. I have honed my skills in Angular, React JS/Next JS and Solid JS. My front end skills are complemented by my proficiency in backend technologies such as Express, NodeJS, NestJS, and MongoDB. My career journey has been enriched by diverse projects spanning different industries like Ecommerce, Fintech, Healthcare, Social Media, and GIS. I bring a solid foundation in front-end development coupled with a deep understanding of backend technologies, making me adept at crafting robust and innovative solutions across various industries.

STRENGTHS AND EXPERTISE

React JS/ NextJS	HTML/CSS/SCSS	Responsive Web Design
Angular	Redux/NgRx	API Development & Integration
JavaScript/ TypeScript	Tailwind CSS/ Bootstrap 5	Performance Optimization
RxJS	Version Control/ Core Web Vitals	Cross-Browser Compatibility

PROFESSIONAL EXPERIENCE

Retail Direct Group   **January 2024 - Present**
Front End Team Lead

As a senior front-end developer and the front end team lead, my job is to spearhead E-Commerce development projects, providing leadership and guidance to developers, collaborating between cross-functional teams (designers, backend engineers, SEO experts etc.) as well as performing audits for performance and scalability. Specializing in Angular, ReactJS, and Next.js, I focus on crafting user-centric solutions that optimize online shopping experiences and drive revenue growth.

Accomplishments:

- Successfully migrated LaptopOutlet website from Magento to NextJS 13.
- Successfully led team effort to migrate, enhance and update comapny's flagship site to Angular 17
- Successfully implemented strategies to enhance performance and user experience for E-Commerce sites. Strategies include Redis caching, Service worker configuration, Server Side Rendering and more.

DEPA Interiors, LLC/ Quaid Technologies   **January 2023 - December 2023**
Senior Front End Developer

Developed the company's main project, a bespoke low code no code app store, completely from scratch. Collaborated with team/client in Dubai for requirement analysis, product UAT, Quality assurance etc.

Accomplishments:

- Successfully developed a custom corporate app store for DEPA, which provides a centralized location for managing the organization and its subsidiaries' applications and modules.
- Successfully implemented many features like a drag-and-drop form builder, Active Directory authentication, workflow creation with approval/rejection functionality, PDF forms, and more.
- Successfully developed an extensive event management system for the Pakistan Endocrine Society

BlockyFy
React JS Developer (Part-Time)   **October 2021 - December 2022**

In my role as a React JS Developer, I was employed part-time by BlockyFy, the parent company of Solis Solutions. I was responsible for developing responsive UI components using React, debugging and troubleshooting performance issues, ensuring quality and scalability of codebases, and integrating APIs using Redux Thunk. Additionally, I led the front-end team, mentored junior developers, and handled deadlines while addressing problems.

Accomplishments:

- Successfully led front-end team in the development and launch of Social Media/NFT platform.
- Successfully developed a secure online wallett for cryptocurrency along with a team of developers.
- Implemented optimized data flow management using Redux, improving state efficiency and performance.

Solis Solutions
Angular Developer   **October 2021 - December 2022**

As an Angular/Front-End Developer, I was responsible for designing visually appealing and responsive user interfaces, conducting code reviews, and fixing bugs to optimize performance. I ensured version control and code upgrades for scalability, incorporated unit tests to validate functionality, seamlessly integrated APIs, and managed state with RxJS Observables and Subjects to improve data flow and application efficiency.

Accomplishments:

- Successfully implemented performance enhancements across multiple platforms through code optimization and bug fixes.
- Improved state management using RxJS, leading to more responsive and efficient applications.
- Delivered high-quality, scalable user interfaces for complex E-Commerce and NFT marketplace platforms.
- Successfully delivered 4 projects including an E-Commerce Merchant platform, a Football Club Media Posting Platform, a Social Media Management Platform and a NFT Marketplace

Freelance Work
Full stack developer   **February 2020 - December 2023**

As a freelance developer, I've successfully completed a variety of projects tailored to meet client specifications. These include student final year projects, dynamic product showcase websites, and personalized portfolios.

Some Projects:

- U.S Border Patrol Museum Memorial Management Dashboard
- Data Scientist Portfolio
- Animation Blogging platform
